

ELECTRICAL MAINTENANCE & TESTING

Let E.S. Boulos Company minimize both unexpected power outages and potential electrical fire hazards at your facility using **TEGG Service®**.

TEGG Corporation developed TEGG Service, a unique and comprehensive system for diagnostic testing, servicing and maintaining of electrical distribution systems in business and industry. TEGG Service is only delivered through the TEGG Contractor Network, an international network of full service electrical contractors, specifically trained and certified by TEGG Corporation to provide this high quality service.

E.S. Boulos Company

When you contract with the E.S. Boulos Company (ESB) for your electrical maintenance and testing needs, you immediately benefit from our high standards of integrity and professionalism.

Founded in 1920, ESB is one of the oldest, largest and most experienced electrical contractors in New England. ESB provides you with the highest quality electrical contracting services that have made us the leading electrical contractor in the region.
